AACPDM 2026 Pre-Conference Course PC1 — Translational Research in Cerebral Palsy: How Emerging Science Will Transform Clinical Care

Philadelphia, PA · September 27, 2026, 8:00 AM–12:00 PM ET · Course Director: Robert E. Akins, PhD

Your feedback shapes future AACPDm courses. Responses are anonymous unless you choose to give your contact details in the last section.

Please return the form before you leave.

1. About you

Primary role (check one):

☐ Pediatric neurologist	☐ Developmental pediatrician	☐ Physiatrist
☐ Orthopedic surgeon	☐ Neurosurgeon	☐ Neonatologist
☐ Rehabilitation professional	☐ Researcher or trainee	☐ Person with CP / family member
☐ Community member or advocate	☐ Other: _____	

Years in practice: ☐ In training ☐ <5 ☐ 5–15 ☐ >15 Prior research experience: ☐ None ☐ Some ☐ Extensive

1B. Staying involved (optional)

☐ I would like information about participating in or referring patients to translational research studies.

☐ I would be willing to be contacted about multi-site research collaboration.

Name: _____ Email: _____

2. Were the learning objectives met?

1 = not at all · 5 = completely

After this course, I am able to...	1	2	3	4	5
1. Explain how perinatal brain injury leads to secondary changes in muscle and motor circuits	☐	☐	☐	☐	☐
2. Describe emerging epigenetic and RNA-based biomarkers for earlier diagnosis and risk stratification	☐	☐	☐	☐	☐
3. Discuss how research on muscle stem cells and contracture biology may lead to new treatments	☐	☐	☐	☐	☐
4. Apply standardized assessment approaches for dystonia in clinical practice	☐	☐	☐	☐	☐
5. Identify opportunities to participate in or refer patients to translational research studies	☐	☐	☐	☐	☐
6. Discuss emerging neuroprotective and neurorestorative therapies with appropriate scientific context	☐	☐	☐	☐	☐

3. Individual presentations

Rate each talk overall — 1 = poor, 5 = excellent. Leave blank if you did not attend.

Presentation	1	2	3	4	5
Encephalopathy of Prematurity: What Clinicians Need to Know — L. Jantzie	☐	☐	☐	☐	☐
Immune Mechanisms in Neonatal Brain Injury — E. Wright-Jin	☐	☐	☐	☐	☐
From NICU to Clinic: Translating Neuroprotection Research — S. Robinson	☐	☐	☐	☐	☐
Epigenetic Biomarkers: Toward Earlier CP Diagnosis — R. Akins	☐	☐	☐	☐	☐
Machine Learning for CP Diagnosis: Promise and Pitfalls — A. Marsh	☐	☐	☐	☐	☐
RNA Biology and Muscle Development in CP — M. Batish	☐	☐	☐	☐	☐
Why Muscles Fail in CP: Stem Cells, Sarcomeres, and Stiffness — S. Dayanidhi	☐	☐	☐	☐	☐
Spinal Cord Changes in CP: The Missing Link? — K. Quinlan	☐	☐	☐	☐	☐
Dystonia in CP: From Neural Circuits to Treatment — B. Aravamuthan	☐	☐	☐	☐	☐

Interactive sessions, panels, and workshops

Session	1	2	3	4	5
Case Discussion: The Preterm Infant at High Risk (Session 1)	☐	☐	☐	☐	☐
Panel: When Will These Biomarkers Reach My Clinic? (Session 2)	☐	☐	☐	☐	☐
Workshop: Assessing Movement Variability for Dystonia (Session 3)	☐	☐	☐	☐	☐
Case Workshop: Integrating Translational Knowledge (Session 4)	☐	☐	☐	☐	☐
Panel: How to Engage with Translational Research (Session 4)	☐	☐	☐	☐	☐

Session	1	2	3	4	5
Closing: Your Take-Home Action Plan	☐	☐	☐	☐	☐

4. Overall course

1 = poor · 5 = excellent

Please rate:	1	2	3	4	5
Overall quality of the course	☐	☐	☐	☐	☐
Organization and flow	☐	☐	☐	☐	☐
Balance of basic science and clinical application	☐	☐	☐	☐	☐
Mix of teaching methods (lectures, cases, panels, workshop)	☐	☐	☐	☐	☐
Usefulness of handouts and materials	☐	☐	☐	☐	☐
Likelihood you would recommend this course to a colleague	☐	☐	☐	☐	☐

Level of content: ☐ Too basic ☐ About right ☐ Too advanced Pace: ☐ Too slow ☐ About right ☐ Too fast

Length (4 hours): ☐ Too short ☐ About right ☐ Too long

5. CME / accreditation

1 = strongly disagree · 5 = strongly agree

	1	2	3	4	5
The content was evidence-based and scientifically balanced	☐	☐	☐	☐	☐
The course was free of commercial bias or product promotion	☐	☐	☐	☐	☐
Faculty disclosures were presented before the content	☐	☐	☐	☐	☐
The course met my professional educational needs	☐	☐	☐	☐	☐

If you perceived commercial bias or promotion in any presentation, please tell us where and what you observed:

As a result of this course, I will:

☐ Change my practice	☐ Confirm my current practice
☐ Seek more information first	☐ Make no change

Describe one specific change you intend to make in your practice, counseling, or referrals:

What barriers might prevent you from making that change?

6. Your take-home action plan

In the closing session, you identified at least two ways to apply this content. Please record them here:

7. Open comments

Most valuable part of the course:

What should we change or improve next time?

Topics or speakers you would like to see in a future course:
